**TARIFF FORMAT**

Page Numbering. Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. From time to time new pages may be added to the tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between pages 5 and 6 would be numbered 5.1.

Page Revision Numbers. Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th Revised Page No. 14 cancels the 3rd Revised Page No. 14.

Paragraph Numbering Sequence. There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level, as shown by the following example:

2  
2.1  
2.1.1  
2.1.1.A  
2.1.1.A.1  
2.1.1.A.1.(a)  
2.1.1.A.1.(a).I  
2.1.1.A.1.(a).I.(i)  
2.1.1.A.1.(a).I.(i).(1)

Check Pages. When a price list filing is made with the Commission, an updated check page accompanies the tariff filing. The check page lists the sheets contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the check page is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). The tariff user should refer to the latest check page to find out if a particular page is the most current one on file with the Commission.

In a cancellation situation, the charge is equal to the unrecoverable costs incurred prior to the request for cancellation and the costs of removal, restoration, and disposal, if any, to comply with the cancellation. Those costs include, but are not limited to, costs of outside vendors, engineering, labor, nonrecoverable materials, and equipment expense.

**COMPETITIVE LOCAL EXCHANGE CARRIER**2.0 General Rules and Regulations (cont'd)2.15 Cancellations and Deferments of Service (cont'd)2.15.2 Deferment of Start of Service

If a request for deferment of service is received by Clear Rate Communications, Inc. prior to the date an order for equipment or service is placed with Clear Rate Communications, Inc.'s supplier, no charge shall apply. For deferments received by Clear Rate Communications, Inc. subsequent to the date the order for equipment or service is placed with Clear Rate Communications, Inc.'s supplier, a monthly recurring charge based upon the costs incurred prior to the request for the deferment applies. This monthly rate shall be equal to 1 ½ percent, plus recurring costs resulting directly from the deferral such as storage, taxes, etc. In addition, any extraordinary nonrecurring costs resulting from the deferral, such as additional engineering, labor, and transportation, shall be billed in total. Billing shall start at the beginning of the month of deferment and extend to the start of service.

Charges shall not exceed the monthly rate that would have applied had the service been established. Clear Rate Communications, Inc. will also charge the Customer who defers service any and all rates and charges incurred by Clear Rate Communications, Inc. for any leased facilities for which Clear Rate Communications, Inc. is held responsible. Clear Rate Communications, Inc. will make a good faith effort to minimize those rates and charges whenever possible.

These promotions may be in the form of waived or reduced recurring and nonrecurring fees, lowered usage charges, or other actions designed to attract new customers or to increase existing Customer awareness of a particular service. All promotions will be offered on a non-discriminatory basis to eligible customers. If Clear Rate Communications, Inc. offers a special promotion it will do so as a tariff supplement filed with Commission on one day's notice.

**COMPETITIVE LOCAL EXCHANGE CARRIER**2.0 General Rules and Regulations (cont'd)2.18 Information Service Access Blocking

Where facilities are available, Customers have the option to block access to all "900" and "976" prefix numbers, without charge for the first block. Clear Rate Communications, Inc. will comply with all applicable rules of the Commission concerning such blocking.

2.19 Caller ID Blocking Service (CIB)

A calling party may block the passage of his/her telephone number, associated main listed name and voiceback of calling identification information to users or subscribers to Optional Central Office Services which utilize Signaling System 7 (SS7) technology. Blocking will also prevent call completion through the use of Return Call (\*69) Service. Customers have two blocking options as follows:

Per-Call Blocking - To activate per-call blocking, a customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per-call blocking, and it is provided on an unlimited basis. Per-call blocking is available to all customers in the Company's serving territory, or

Per-Line Blocking - Per-Line Blocking must be added to a customer's line by contacting the Telephone Company's business office and having a service order issued. All calls are automatically blocked when a customer subscribes to Per-Line Blocking unless the blocking feature is deactivated. If a customer subscribes to Per-Line Blocking, he/she can deactivate blocking by dialing a special code prior to placing a call. Blocking will be deactivated for that outgoing call only. As facilities permit, a Per-Line Blocking customer will be provided with a separate code to deactivate blocking, which is different from the per call blocking code. Where this separate code is not available, the code for per-call blocking and the code to deactivate Per-Line Blocking will be the same. Per-Line Blocking is available to all customers in the Company's serving territory. Per-Line Blocking is provided without charge, except as discussed below.

Per-Line Blocking will be available to all customers, free of charge, in the Company's serving area and can only be added or removed from a customer's line by placing a service order with the Company. Initial requests for Per-Line Blocking will be provided at no charge. Subsequent requests for Per-Line Blocking for the same customer and telephone number at the same address may be charged the applicable non-recurring charge(s). This non-recurring charge will be waived for customers of the Company who are victims of domestic violence, the staffs of domestic violence programs and agencies, and emergency services personnel, while performing their jobs.

**COMPETITIVE LOCAL EXCHANGE CARRIER**2.0 General Rules and Regulations (cont'd)2.19 Caller ID Blocking Service (CIB) (cont'd)

Customers who use either per-call blocking or line blocking may be unable to complete calls to Caller ID subscribers who have activated the Anonymous Call Rejection (ACR) feature of Caller ID services. If a customer using blocking calls a Caller ID subscriber who has activated ACR, he/she will hear an announcement that the Caller ID subscriber is not accepting blocked calls. There are several ways to complete a call to a Caller ID subscriber who has activated ACR: (1) place the call through an operator; (2) place the call on the Company's network using a Company's telephone calling card; or (3) place the call without blocking. Options (1) and (2) involve charges in addition to the cost of the call. However, the live operator surcharge will be waived for the Company's customers who are victims of domestic violence, the staffs of domestic violence program agencies and emergency service personnel, while in the performance of their jobs. If the operator surcharge cannot be waived when the call is being placed, the Company will, upon notification, credit the live operator surcharge to the aforementioned party's telephone bill. Furthermore, should alternative methods become available in the future which permit the aforementioned to access the ACR party without revealing the caller's telephone number, the Company will waive any additional charges associated with such alternative methods. Blocked calls routed to the ACR announcement will not be rated as completed calls.

Caller ID blocking will not prevent the delivery of telephone numbers to 911 emergency service providers. Caller ID blocking currently will not work for callers who place calls to 8xx, 900, and/or other information and message services carrying a specific charge billed to a caller by a local telephone company.

**COMPETITIVE LOCAL EXCHANGE CARRIER**2.0 General Rules and Regulations (cont'd)2.21 Toll Presubscription

Toll Presubscription is a procedure whereby a customer designates to the Telephone Company the IntraLATA and InterLATA Toll Providers, i.e., Interexchange Carriers (IXCs) which the customer wishes to be the carriers of choice for toll calls. Such calls are automatically directed to the designated carrier(s) without the need to use carrier access codes or additional dialing to direct the calls to the designated carrier. Toll presubscription does not prevent a customer, who has presubscribed to a toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred IXC, only one access code of that carrier may be incorporated into the switching system of the Telephone Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other service(s).

An IXC must use Feature Group D (FGD) Switched Access Service to qualify as a presubscription toll provider unless prior arrangements have been made with or by the Telephone Company. IXCs must submit an Access Service Request (ASR) to the Telephone Company.

Selection of toll presubscription provider by an end user is subject to the terms and conditions following.

At the option of the IXCs, the nonrecurring charge for a change in toll presubscription, as provided herein, may be billed to the IXCs, instead of the end user. This may involve charges resulting from end-user initial free choice Preferred Interexchange Carrier (PIC), as specified in 2.21.1. following.

### 2.0 General Rules and Regulations (cont'd)

#### 2.21 Toll Presubscription (cont'd)

##### 2.21.1 Presubscription Charge Application

End user choices for toll presubscription:

Designating an intraLATA and interLATA IXC(s) as primary carrier(s) thereby requiring no access code to access those IXCs' service. End users are not required to choose the same IXC for intraLATA and interLATA toll presubscription. Other nonpresubscribed IXCs are accessed by dialing 10XXX, 101XXXX, or other required codes.

Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all IXCs.

If a new customer cannot decide upon presubscription IXCs, the Telephone Company may extend a 30-day period following completion of the initial service request to make a choice without charge. In the interim, the customer will be assigned as a 'No-PIC' and must dial an access code to make toll calls.

If an IXC elects to discontinue Feature Group, the IXC is obligated to contact, in writing, all end users who have selected the canceling IXC as their preferred toll provider. The IXC must inform the end users that it is canceling its Feature Group D Service, request that the end user select a new IXC, and state that the canceling IXC will pay the PIC change charge as provided herein. The IXC must provide written notification to the Telephone Company that this activity has taken place.

Following the IXC's discontinuance of service, the Telephone Company will bill the canceling IXC the change charge for each end user that is currently designated to the IXC at the time of discontinuance.

An unauthorized PIC change is a change in the presubscribed IXC that the end user denies authorizing. PIC disputes for end users are resolved through an investigative process.

If an unauthorized change in toll presubscription occurs, the IXC making the unauthorized change will be assessed a charge for unauthorized change in presubscription as provided at the end of this section. In addition, the IXC will be assessed the applicable charge for returning the end user to the preferred IXC.

When a discrepancy is determined regarding an end user's designation of a presubscription IXC, the following applies depending upon the situation described:

A signed letter of authorization takes precedence over any order other than subsequent, direct customer contact with the Telephone Company.

When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines customer choice.

#### 2.25 Pennsylvania Telephone Relay Service

##### 2.25.1 General

The Pennsylvania Telecommunications Relay Service (PA TRS) is a relay telecommunication service for the deaf, hard of hearing, hearing and/or speech disabled population of the Commonwealth. The PA TRS is mandated by the Americans with Disabilities Act of 1990 to provide functionally equivalent telephone services that are available to other U.S. citizens, at no additional cost. The PA TRS includes both traditional relay (devices such as Teletypewriters (TTY) and Telecommunication Devices for the Deaf (TDD)) and captioned-telephone voice-carry-over relay services (captioned telephone). These relay services permit telephone communications between individuals with hearing and/or speech disabilities, who must use a TTY, TDD or captioned telephone, with individuals having normal hearing and speech. Additionally, 711 abbreviated dialing is available to access the PA TRS. The Company's switching equipment is arranged to translate the "711" calls to the assigned toll-free number, (888) 895-1197, in order to route calls to the Telecommunications Relay Service Provider, in accordance with Commission's Order entered on February 4, 2000 at Docket No. M-00900239.

(Access lines are those lines extending from the telephone company's central office to the end-user's premises.) This surcharge applies regardless of whether or not the access line uses the PA TRS.

The Commission shall compute the PA TRS surcharge each year and notify local exchange carriers of the surcharge amount to be applied for the twelve-month period commencing with July 1 of each year.
